

Logimize

Problem

Cost inefficient ways of transporting packages for small to medium business.

Over reliance on big companies to do the delivery job.

Not many routing and scheduling applications available for small and very small businesses

Solution

Empowers small to medium businesses to manage their own delivery services, reducing reliance on big companies

Provides comprehensive analytics tools for monitoring vehicles, packages, and drivers in real-time

Utilizes an efficient routing algorithm to optimize delivery routes, reducing time and fuel costs.

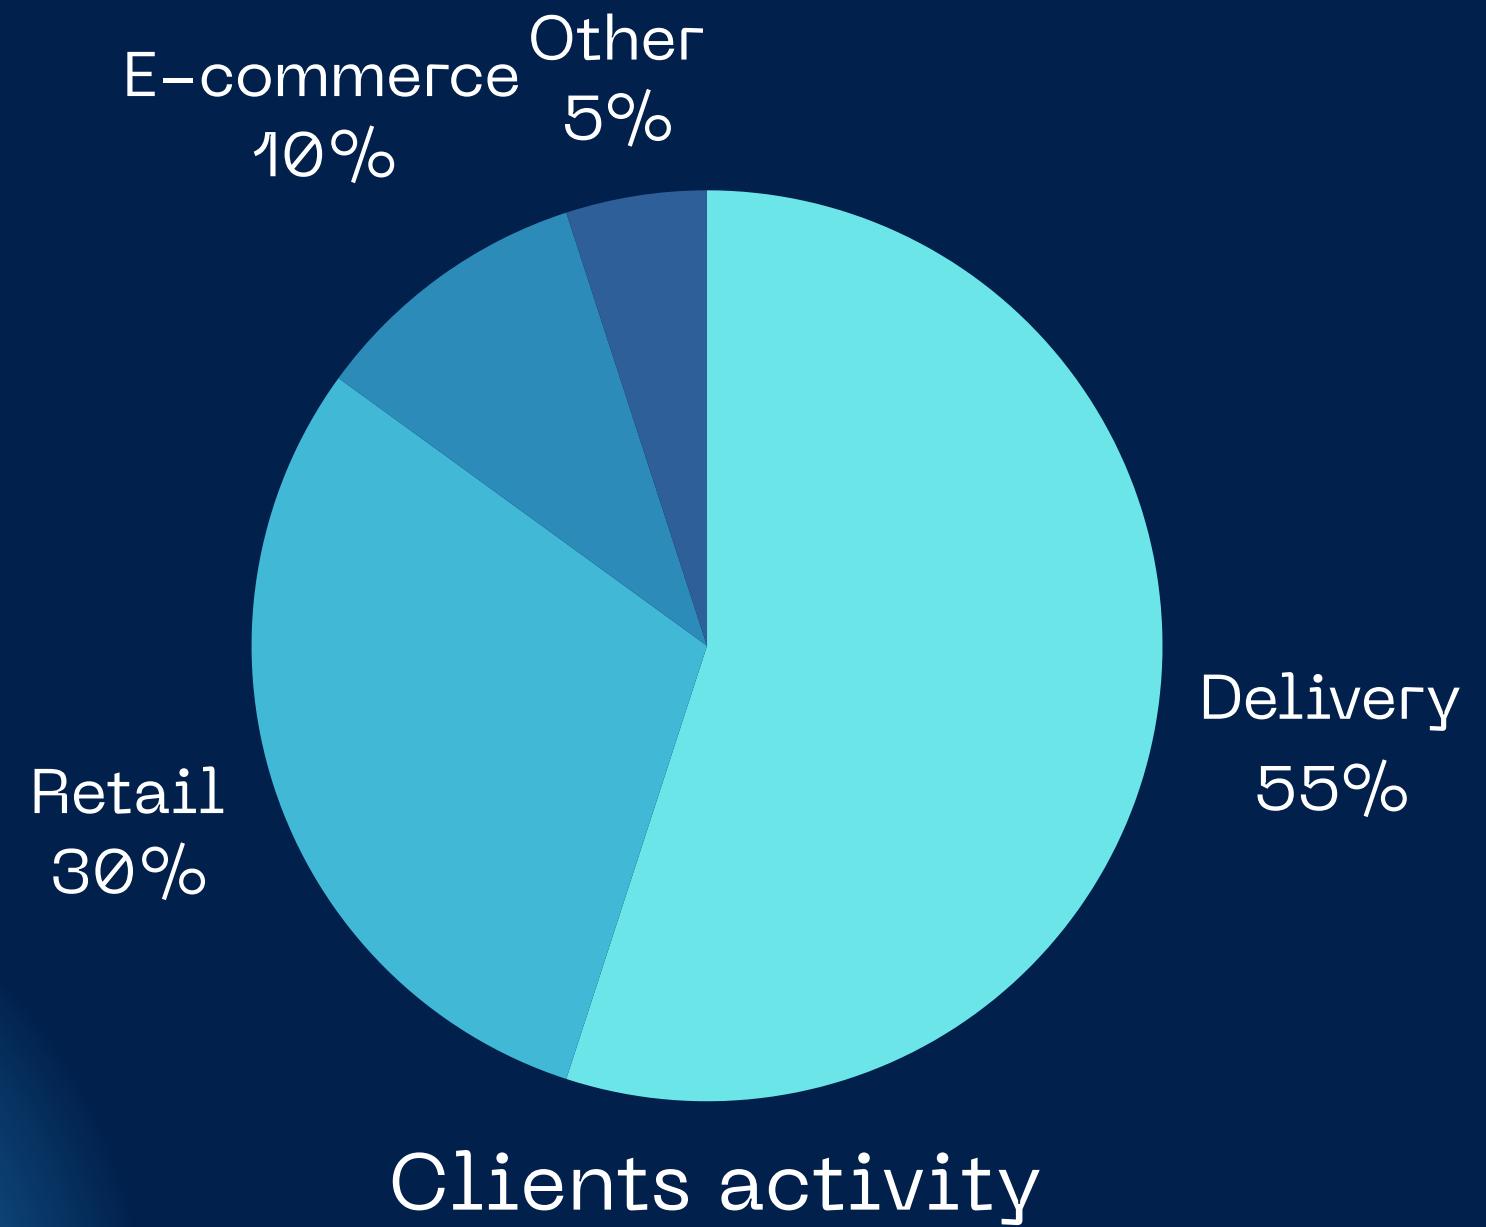

Enables businesses to improve efficiency and customer satisfaction through data-driven insights and informed decision-making

Market Research

Over 100,000 businesses currently benefit from Logimize, with 10,000 new businesses created each year. A significant percentage of these new businesses can potentially utilize our product to streamline their delivery operations.
